Name: Seaside

Summary: Develop clean, complex, and reusable web components.

Author: Avi Bryant

Owner: Avi Bryant <avi@smallthought.com>

Co-maintainers: Julian Fitzell <jfitzell@gmail.com>, Lukas Renggli <renggli@iam.unibe.ch>

Description:

A framework for building sophisticated web applications in Squeak. Develop for the web using reusable, embeddable components and unique call/return semantics for moving between pages.

□

□Seaside requires a web server; the most commonly used is KomHttpServer.
